

SecondMedic

www.secondmedic.com

*Providing quality
healthcare remotely
but feel supported like
a family physician
next to you every
second.*

Top Reasons for Medical Second Opinion

1. Possible choice for treatment.
2. Current Doctor is not sure what is wrong with you.
3. Rare or unusual diagnosis.
4. Another treatment might be available.
5. Current Doctor is not a specialist in your condition.
6. Trouble talking with your doctor
7. Need the treatment options validated.

Top Reasons for Medical Second Opinion

OUR HISTORY

Second Medic was founded to address the gap which currently exists in medical space dealing with the anxiety of patients wanting to know if they are on the right treatment path and what alternative options they have. We aim to make Second Medic to be the one stop solution for any and all healthcare needs which can be addressed remotely. Medical second opinion market is anticipated to hit \$6.23 billion by 2023 at a cagr of 18.2%. There is no other company in world which holds customers hands and joins them in their health journey to ensure patients interests are protected. We are the first company founded with the concept of becoming active healthcare partner similar to a family member who is also doctor trying to protect patient members interest.

*Healthcare should
not be a privilege, but
a right to all.*

ABOUT US

Our Vision

Second Medic aims to providing seamless connection to our leading healthcare experts and improve accuracy by optimizing medical diagnosis. Our core objective is to provide best in class Remote Medical Second Opinion supporting our patients Globally. As healthcare delivery shifts to a patient-centric model of care, Second Medic leads by cutting edge technology supported by best SMEs across Globe. We accomplish improved accuracy by providing multi panel, multi disciplinary clinical grade triaging process underpinned with Patented AI based scoring technique. Striving for excellence we are committed to delivering end to end solution and not just a fragmented medical view in form of a report.
